

I'm not robot!

Leaks have gone out of control in Samsung's view, at least judging by the fact that it recently began taking action against a few popular online sources of information. Samsung is supposed to unveil the Galaxy S22 and Galaxy Tab S8 lineups at Unpacked 2022 on February 9, but in essence, there's nothing more to [...] By Mihai Matei6 months ago Samsung appears to be developing a new pair of neckband earbuds, except they're a bit unusual. The company is seemingly trying to combine the Galaxy Buds TWS (totally wireless) and neckband earbud form factors into a single product, the latter of which was showcased at WIPO (World Intellectual Property Organization) recently. Samsung applied to secure [...] By Mihai Matei11 months ago Samsung has just published a guide on one of its portals to explain the proper steps for cleaning the Galaxy Buds series of earbuds, including the Galaxy Buds+, the Galaxy Buds Live, and the Galaxy Buds Pro. What's interesting about this guide is that it was published not long after the state-owned media in China [...] Samsung is among the top three brands in the global true wireless earphones market. It makes some of the best TWS (True Wireless Stereo) earphones globally, and the recently released Galaxy Buds Pro is the only real competitor to the Apple AirPods Pro. It is being expected the South Korean firm will maintain its third [...] By Asif Iqbal Shaik1 year ago The International Data Corporation has released its overview of the wearable device market for the fourth quarter of 2020. Global shipments of wearable devices hit 153.5 million, showing a 27.2% increase year-over-year. The holiday quarter certainly played its role in this YoY increase. The IDC also points out that consumer spending on electronics increased as [...] By Adnan Farooqui1 year ago There's no better way to describe the TWS (true wireless stereo) earbud market in India other than 'it's booming,' but sadly, Samsung appears to be watching it all from the sidelines. According to a new report from market research firm Counterpoint Research, TWS shipments in India throughout Q4 2020 were up a whopping 641% year-on-year, [...] Keeping up with the latest updates on your earbuds is easy when you install Galaxy Buds Manager or Gear IconX Manager on your computer. You can also use the Galaxy Wearable app on your phone or tablet or the Galaxy Buds app on your PC. These apps will let you pair and control your earbuds as well as check for software updates for them. That way, you can ensure they stay current and you'll get to enjoy all of your favorite music. Note: These instructions are also applicable to the Gear IconX (2017) version. To ensure your software updates run smoothly, there are a few things you can do on your phone, tablet, or computer. If you have a Galaxy phone, first connect your Galaxy Buds series earbuds or Gear IconX earbuds to the Galaxy Wearable app on your phone or tablet, or on the PC manager software in order to check for updates. Note: The Galaxy Buds Pro and Buds Live are not compatible with Galaxy Buds Manager on the PC. If you have an iPhone, the Galaxy Buds+ and Galaxy Buds Live can be updated on iOS using the Galaxy Buds app. Open the app, select your earbuds, and then tap Earbuds software update. Note: The original Galaxy Buds, Galaxy Buds2, and Galaxy Buds Pro are not compatible with the iOS Buds app. To see what's included in the update before installing it, you can tap What's new on the update popup. That way, you'll know exactly what is being changed. If you're experiencing issues while updating your earbuds, you can restart them by placing them in the charging case and closing the lid for 10 seconds. When a software update is available for the earbuds, the Galaxy Wearable app will notify you with a popup. Tap Update, and then follow the prompts. The earbuds will disconnect from the phone. Once the update is complete, the earbuds will automatically reconnect with the phone. To manually check for software updates, both earbuds must be charged and connected to the app. Insert the earbuds into the charging case, leaving the lid open. From there, use the appropriate steps based on the type of earbuds you have: Galaxy Buds Pro, Galaxy Buds Live, and Galaxy Buds+. Tap Earbuds software update, and then tap Download and install. Galaxy Buds2: Tap Earbuds software update, and then tap Download and install. Galaxy Buds: Tap About earbuds, tap Update earbuds software, and then tap Download and install. Gear IconX: Tap the SETTINGS tab, and then tap About Gear. Tap Update Gear software, and then tap Download updates manually. Note: Galaxy Buds Manager on PC is not compatible with the Galaxy Buds Pro or Galaxy Buds Live. You can also update your earbuds using the Galaxy Buds Manager or Gear IconX Manager on your PC. From your computer, whether it's a Mac or Windows, navigate to the Download Center page for the Galaxy Buds or the Gear IconX. Using the drop-down menu, choose your model (Galaxy Buds, Galaxy Buds+, or Gear IconX), and then select CONFIRM. Select DOWNLOAD under the Software section to download the installation file for Galaxy Buds Manager or Gear IconX Manager. Once the download is complete, run the file, and then use the on-screen prompts to complete the installation. Next, make sure Bluetooth is enabled on both the computer and buds, and then open the appropriate earbuds app on the computer. Place the buds in the case if they aren't already, and close the lid. Open the case to put them in pairing mode. You can also enable pairing mode by touching and holding both touchpads while wearing the Buds or Gear IconX. On the computer, open the Galaxy Buds Manager app or Gear IconX Manager app. Make sure the earbuds are connected to the PC, and then select Connect. Once the earbuds are paired, click Check for updates. If an update is available, you can install it from here. Note: The Galaxy Buds PC app is only compatible with the Galaxy Buds Live, Galaxy Buds Pro, and Galaxy Buds2. The Galaxy Buds PC app can be downloaded from the Microsoft Store, and you can use the app to update your buds. On your PC, navigate to and open the Galaxy Buds app, and then select Start. Make sure your Galaxy Buds are fully charged and place them in the charging case. Open the case, and then select Connect in the app. On the Pair device popup, select Allow, and then select Close. Review the information on the screen, and then select Next. You'll see the app screen for your Galaxy Buds; select Earbuds software update near the bottom of the screen. Select Download and install to check for updates. If an update is available, you'll be able to install it. Thank you for your feedback! mobile/audio/wireless-earbuds © 2022 Samsung Electronics America, Inc. Samsung, Samsung Galaxy and Family Hub are trademarks of Samsung Electronics Co., Ltd. Apart from phones and smartwatches, it is also possible to update the firmware of your wireless earbuds. In fact, Samsung tends to roll out regular firmware updates for the Galaxy Buds lineup to add new features and improve their connection stability. If you own a pair of Galaxy Buds, follow the guide below to update them to the latest firmware. What to Know Before Updating the Firmware of Your Galaxy Buds You cannot upgrade the firmware on the Galaxy Buds without using the Galaxy Wearable app. While it is possible to connect the Galaxy Buds Pro and newer earbuds from Samsung to an iPhone, a Mac, and Windows PCs, you cannot update the firmware using any of these devices. You'll need to use an Android phone with the Galaxy Wearable app installed on it. You can update the firmware on the following Galaxy Buds models: Galaxy Buds Galaxy Buds Plus Galaxy Buds Live Galaxy Buds Pro Galaxy Buds2 Ensure that your Galaxy Buds are paired and connected to your phone and have at least 50% battery before starting the process. Open the Galaxy Wearable app on your phone. If you have multiple Galaxy accessories connected, bring up the navigation drawer by tapping the menu icon in the top-left corner, and then select the earbuds from the list. Scroll down and tap on Earbuds settings followed by Earbuds software update. The app will check for and download any available firmware updates. Once downloaded, tap the Update button to start the installation process. The installation will take some time and requires that the earbuds are connected to your phone with the lid of the charging case open during the entire process. Samsung has consistently updated the Galaxy Buds to add new features to them, like detecting whether you are wearing the earbuds when on a call or not, the ability to activate ANC on the Buds2 even while wearing one earbud, and more. The addition of new features is a nice incentive for you to keep the earbuds updated to the latest firmware. Image / Samsung If you are using the Samsung Galaxy Buds or Buds+, it is always the best time to update your firmware for better software performance. The big tech company rolls out new updates regularly to improve the stability and reliability of its Galaxy Buds series of wearables. Users can get and enjoy better connection and sound quality on their earbuds. Updating your Galaxy Buds firmware is easy and if you haven't done it yet, just follow the steps below. You can update your Galaxy Buds using your smartphone or your PC/Mac. Tips on Updating your Samsung Galaxy Buds Firmware Before you begin updating your Galaxy Buds, take note of the following tips first. Make sure you have a good Internet connection. You will have to update the software and a good connection will create a smooth and uninterrupted process. Close current apps that may be running in the background. This will help maximize resources for downloading and installing the updates. Make sure to completely exit any app that is not related to your update. Check for updates on the app that you will use for updating your Galaxy buds. Whether you are using the Galaxy Wearables app on your mobile phone or the Galaxy Buds Manager and Gear IconX Manager on your PC or Mac, check if there are existing updates available for the app and install it before updating your buds. That way, it can help in the seamless process. Charge your Galaxy Buds. Place your Galaxy Buds inside the charging case and close the lid. Make sure to close any app that you are using with the earbuds. Charge your buds for at least 30 minutes. How to Update the Software on your Samsung Galaxy Buds Update Galaxy Buds Firmware using Galaxy Wearables App on your Mobile User Image / Reddit First, open the Galaxy Wearables app. Tap the Galaxy Buds+. Next, look for the Earbuds software update. Tap to open. Tap Download and Install. Any available update will be shown. At the bottom of the screen, tap Download. A notification will appear. Read the instructions and tap OK. Wait for the update process to finish. Update Galaxy Buds Firmware via Galaxy Buds Manager or Gear IconX Manager on PC or Mac Open the Galaxy Buds Manager app or the Gear IconX Manager on your computer. If you do not have the app yet, download the app at the Samsung official website. Follow the setup instructions to install the app on your computer. After launching the Galaxy Buds Manager app, click Connect. Click your Galaxy Buds+. It will connect your earbuds to your computer. Next, select Check for updates. Install available updates. It is that easy! With the new updates, you can enjoy a cooler experience using your Samsung Galaxy Buds. What do you think of the latest firmware update on your Galaxy Buds? Share your thoughts with us in the comments below.
